User creates a new note in SPA

Browser

Server

On form submit JS intercepts it
and prevents default
it adds the date to the new entry
and then add it to the list

then it clears the form
then it forces to for browser to render all the notes again
and then it sends the data to server for saving or what not

POST /new_note_spa →

← HTML/1.1 201 created {"message":"note created"}
